DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. To correct this, the recitation "The present disclosure relates to a" should be replaced by "A". The examiner can make this change.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by either one of Schwab (3,204,391) or Roosevelt et al. (1,471,807).
4. Schwab ('391) teaches a conical filter element attached to a generally square cooling system duct opening with a frame and fastening means (see figures 1-3, col. 2, line 18 to col. 3, line 8). Roosevelt et al. ('807) teaches a conical filter attached to the circular opening of an air treatment duct using a bead retainer (see figure 2, page 1, lines 76-83).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references listed on the attached PTO-892 form disclose conically shaped air filters.
